## SKILLS

- Frontend: ReactJS, Angular
- Backend: .NET Core, NestJS, NodeJS
- Database: SQL Server
- DevOps: Terraform
- Languages: C#, JavaScript, TypeScript

## Languages

- English (C1)
- Spanish (Native)
- German (B1)

## PROFILE

Full-stack Software Engineer with 4+ years of experience building scalable enterprise web apps in .NET Core, React, and NestJS. Proven track record shipping secure, performant features for Fortune 500 clients and startups alike. Passionate about clean architecture, automation, and delivering business value through code.

## EXPERIENCE

### ○ Ssr. Software Engineer

John Deere

September 2023 - Present

At John Deere, I worked on web applications for parts management, using ReactJS, NodeJS, and Terraform within a microservices architecture. My role focused on delivering frontend components, building APIs, and collaborating closely with product teams to turn user stories into functional, scalable features.

### ○ ReactJS Developer

Podium Pick'em Challenge - Contractor

April 2024 - June 2024

Developed a responsive frontend for a sports prediction platform linked to Olimpia 2024 using ReactJS. Focused on building a fast, intuitive user experience with reusable components under tight deadlines.

### ○ Ssr. .Net Developer

PwC

August 2022 - September 2023

I co-led a small team focused on securing and improving legacy .NET web applications for US-based clients. My work involved fixing vulnerabilities using Checkmarx, developing new features, and improving accessibility compliance — combining security insight with hands-on .NET development.

## ○ .Net Developer

Ingenea S.R.L  
December 2021 - August 2022

I built and maintained backend features for clients across Argentina, Brazil, and Mexico. My responsibilities included developing .NET Core APIs, managing SQL Server stored procedures, and ensuring clean data flows through repositories and services tailored to each client's needs.

## Education

### ○ Universidad Abierta Interamericana

Bachelor's in Technology Information Management  
April 2025 - Present

Currently pursuing a Bachelor's degree focused on IT management, software systems, and strategic tech administration. Coursework includes IT governance, project management, and enterprise-level systems.

### ○ Instituto Zona Oeste

Technical Degree in Software Development  
Mar 2019 – Nov 2022— GPA: 7.33

Completed a technical program centered on software engineering fundamentals and applied technologies. Gained hands-on experience with .NET Core, C#, Angular, SQL Server, and modern web development practices.
