PROFILE

Presently, I hold the role of Ssr. Software Engineer at John Deere. Over the past few years, I have been fortunate enough to work on a diverse array of exciting projects, honing my skills in this dynamic field. However, my quest for knowledge moves me ever forward, consistently seeking fresh opportunities to grow and improve.

EXPERIENCE

○ Ssr. Software Engineer

John Deere
September 2023 - Present

Currently i work at John Deere. My work is to coin all of my tools available to develop new solutions for the parts management using the newest tools, interpreting the User Stories and leading them to a culmination.

○ ReactJS Developer

Podium Pick'em Challenge
April 2024 - June 2024

Worked developing a web page related to the 2024 Olimpia. For that purpose i've used ReactJS as the main tool

○ Ssr. .Net Developer

PwC
August 2022 - September 2023

My main responsibilities were to work and co-lead at a team specialized at fixing web applications security issues, using for this purpose specialized tools and researching the found issues on my own. I also develop new application features and implement accessibility improvements for clients residing at the US

○ .Net Developer

Ingenea S.R.L

December 2021 - August 2022

I was in charge of the development of new features to clients residing at Argentina, Mexico and Brazil, and some of my responsibilities were the development, engineering and maintenance of new endpoints, services, repositories and connecting them to the database, while also taking care of the databases SPs, which were crucial for the projects i worked in.
